	My colleagues are willing to work at changing this school for the 9%	<mark>6</mark> 70%		
Willingness to be Held Accountable	I am willing to be held accountable for student learning	91%		
	My colleagues are willing to be held accountable for student learn	74%		

Percent Negative Percent Positive

l vs They Gap

What is an <u>I vs They</u> Gap and why does it matter?

The more positive the beliefs and perceptions of the staff are about their readiness and willingness to change, the more efficiently change will happen.

Look for large gaps between the $\underline{\sf IvsThey}$ pair of questions. Large gaps are a sign of distrust amongst staff members.

If the <u>I vs They</u> gaps to the right are red, the value is beyond a threshold to cause some concern and should be investigated. This threshold is **20% at the elementary level** and **25% at the secondary level**.

	My colleagues are willing to be held accountable for	2021		91%	
	student learning	2023		74%	

Percent Negative

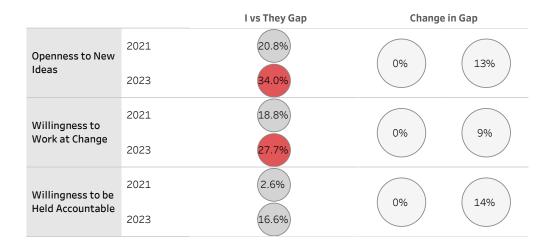

Percent Positive

Why does the gap between <u>I vs. They</u> matter?

The more positive the beliefs and perceptions of the staff are about their readiness and willingness to change, the more efficiently change will happen.

Pay attention to large gaps in responses between the <u>I and They</u> paired survey items. Large gaps indicate differences in opinions and perceptions and may represent a lack of trust amongst staff. If the <u>I vs They</u> gaps to the right are red, the value is beyond a threshold to cause some concern and should be investigated. This threshold is **20% at the elementary** level and **25% at the secondary level**.

Note any growing gaps when looking at the longitudinal data (lower-right viz). If the most recent year's gap percentage is higher than the previous year's gap percentage, this means the gap is growing. If the gap has narrowed or decreased over time the change is represented by a negative value. Narrowing the gap is GOOD!

#### Pullman High School | Pullman Public Schools

## Why use similar survey items acros Staff, Family and Student surveys?

By asking the same or very similar survey items of each stakeholder group, you can triangulate the data around potential school issues, illuminate themes or a specifi challenge, and ultimately defi a solution.

For example, if students feel safe at school but families fee differently, why? Questions that have a large difference between groups warrant additional conversations.

|       |                  |                                                                                                       |     | 2021 | 2023 |

### What to look for...

Look not for the same increase, but rather movement in the same direction across all surveys.

When you see movement in the same direction, stagnation or incongruent movement, ask yourself why?

#### **EES Toolkit - Common Questions**

## What is your current land of opportunity - Staff 2023 School Year?

These are the survey items from your current administration with the highest percentage of neutral responses (Sometimes True). These are the items where you have the greatest opportunity to influence your Staff and shift their perceptions from neutral to positive.

Are there common themes amongst the individual survey items? Do all of the items fall within a single Characteristic?

| Pullman High School   Pullman Public Schools                                                      |       |
|---------------------------------------------------------------------------------------------------|-------|
| CSF — Staff share a high sense of urgency around the need to improve                              | 47%   |

| CSF — Important decisions here are based on the goals of this school                              | 43%   |
| FPD — We talk about race and bigotry as a staff                                                   | 43%   |
| D-This district facilitates systems and programs to support school improvement                    | 40%   |

| Negative values are a good thing, indicating staff moved out of "Sometimes True" responses.             |        |
|---------------------------------------------------------------------------------------------------------|--------|
| D — District leadership communicates effectively with my school                                         | -29.3% |
| D — Collaboration between district and schools is based upon trust and respect                          | -15.4% |
| D — District administrators communicate a clear vision of good instruction and essential curriculum     | -15.0% |
| C — There is a willingness to address conflict in this school                                           | -13.6% |
| FPD — I receive training on instruction to support social emotional learning                            | -12.7% |
| RTB — My colleagues are willing to be held accountable for student learning                             | 16.4%  |
| D — This district facilitates systems and programs to support school improvement                        | 17.8%  |
| EL — Staff at all levels are treated fairly here                                                        | 21.6%  |
| EL — The school leadership team is comfortable presenting new ideas to the staff                        | 21.7%  |
| SLE-SLE — $Staff$ members enforce consistent behavior expectations and consequences in their classrooms | 23.4%  |

#### From our previous survey, how did our responses shift from the neutral or "Sometimes True" responses?

To the left are the survey items with the largest decrease and increase in neutral responses from the previous survey administration. The percent of staff who moved from neutral to positive are **blue**, and the percent who moved from neutral to negative are **orange**.

What influences these changes in perceptions? What can we do to shift more staff to "Almost Always True" and "Often True" responses?

#### EES Toolkit - The Land of Opportunity Staff

# What Staff survey items from your 2023 School Year have 33% or more Neutral responses?

This chart identifies the questions where 1 in 3 or at least 33% of the responses were neutral (Sometimes True).

Everyone has a belief or an opinion, but some have a hard time committing one way or another. Perhaps they are not sure how they feel (need more information) or they are afraid to express their opinion on certain survey items (lack of trust or fear of repercussions).

It is much easier to learn about the strengths and needs of staff when they have and share definite opinions. This significant percentage of staff represents an identifiable opportunity to focus efforts and resources toward the specific areas where staff require more information, help or clarity.

Whatever the reason, having conversations, sharing information, evaluating decision-making and making changes must continue.
